

HW4: Group Setup

Read time: 2 minutes (558 words)

We need to set up teams for several projects you will work on for the rest of this class.

Ideally, groups consist of 3-4 students. If you wish to form a team with less or more students, you will need to contact me first.

All you need to do to complete this assignment is to set up your group, figure out a reasonable name for the group and email your name and the group name you have selected. The first group assignment will have a link where you actually set up the team. Read that assignment carefully, and let me know if you have any issues getting set up.
